

LCAP Update and Engagement 2014-2015

The new Local Control Funding Formula (LCFF) instituted by Governor Brown and the legislature last year required that Districts develop a Local Control Accountability Plan (LCAP). Development of the LCAP required “Stakeholder engagement”, i.e. that Districts create a process for identified stakeholders to participate in the process. In our process we aligned existing District priorities with the eight state priorities, used a gallery walk process to obtain stakeholder feedback, and through this process, identified five (5) key LCAP goals for implementation in 2014-2015. These were A-G Coursework and Completion, Access to Technology, Parent Involvement, Common Core Implementation, and Professional Development.

We are once again involving our stakeholders in this process. Our task is to review the five goals, described action steps we have taken to implement the goals and seek feedback on what has worked, what we should we keep doing or stop doing, what we should enhance and/or add, focused on what will improve educational outcomes for our targeted sub-groups, English Learners, Foster and Homeless Youth, and Educational Disadvantaged Youth.

We would like to seek stakeholder input as we undergo the revision process of the *Local Control Accountability Plan* (LCAP). All school sites are undergoing this same process through a series of site meetings that all stakeholders are welcome to participate. You can also participate by completing the survey online at your leisure.

You can access the LCAP video on the district website under the LCFF tab at www.sweetwaterschools.org. Below are links to both the parent and student surveys.
